Community Picnic Postponed to July 15th

LOCAL & GENERAL

The heavy rain Monday was very much welcomed by the people of the district, but it was not conducive to holding a successful picnic, so the business men decided to postpone the community picnic to Wednesday July 15th. Keep that date open.

Public School Teachers Are Re-appointed

At the meeting of the schoolboard Monday evening all the teachers of the Public School were re-appointed at the same salaries as last year. Mr. Ross Ford, principal, will teach grades 7, 8; Mr. A. Reiber, grades 5, 6; Miss A. Black, grades 3, 4; Miss Nellie Wilson, grade 2 and Miss Ruth Liesemer, primary. Mr. Albert Russell, of Camrose was appointed principal of the High School, but the appointment of the other two teachers was held in abeyance.

Postage Rate Changes

**Effective July 1st, 1931
Canada**

For Local Delivery: 2 cents first ounce; 1 cent each additional ounce.

Rural Route is not Local Delivery.

For Other Offices in Canada: 3 cents first ounce; 2 cents each additional ounce.

British Empire, France, U.S.A.: 3 cents first ounce; 2 cents each additional ounce.

Other Countries: 5 cents first ounce; 3 cents each additional ounce.

Postal Cards: No Change.

Tax of 1 cent on all Postal Notes and 2 cents on Money Orders, irrespective of amount.

Farewell Tea Given Mrs. W. A. Teskey

A few forty ladies of Knox United Church Ladies Aid turned out to Mrs. W. Thurlow's residence on Friday where a farewell tea was given in honor of Mrs. W. A. Teskey who is leaving the district to reside in Calgary.

Mrs. Teskey was the recipient of a beautiful present and was given the thanks of the members for the good work she had done for the society and church and all present wished her success in her new home.

BASEBALL

The local ball tossers went on another batting rampage Friday evening last to beat Three Hills 8-5. The home team started out in the fourth inning with a home run and three more counters in the fourth frame saw Davidsen, the visiting hurler pulled from the box and replaced by McNaughton who held Didsbury down until the eighth when two hits scored another run.

Three Hills got their runs in the third, fourth and fifth innings. Some heavy hitting, including a 3-bagger and a home run did the trick. Scotty Lee went the route for Didsbury and was never in serious trouble. He allowed six safeties and fanned ten men.

Didsbury: Wyman, 1b; Stauffer, 3b; Cook, ss; S. Lee, p; H. Lee, 2b; Woodlock, c; Goader, cf; Russell, lf; R. Berscht, rf.

Three Hills: Bishop, c; Sinke, 3b; Parker, ss; Swallow, 2b; McNabb, 1b; Mills, c; Dewar, rf; Davidson, p; McNaughton, lf.

Didsbury: 300 400 010—8* 13 5

3 Hills: 001 220 000—5 6 5

Umpire: C. E. Reiber.

Local Canadian Legion Meeting.

At the meeting of the Canadian Legion held in the Oddfellows Hall Saturday evening last there was a large attendance of members to hear Comrade J. Robertson speak on the "Honourable Side of the War." Mr. Robertson was particularly well adapted to handle his subject and kept his audience interested and he related many funny incidents which occurred, sometimes in very serious positions.

Mr. H. B. Adshead, ex-M.P., of Calgary who was one of the visitors complimented the speaker on the way he handled his subject and urged the members not to forget the objects for which they fought.

During the business meeting which preceded the lecture, the secretary reported that the field day and sports given by the Legion had been successful in every respect and that a tidy sum had been added to the exchequer.

Farewell Sermons At Two Churches

It is not often that two farewell sermons are preached on one day in two churches in the same town, but this occurred here Sunday last.

The United Church was crowded to the door when Rev. A. E. Hayes gave his farewell to his congregation. He took to his subject, "If I Had Only One Sermon to Preach."

There was also a large congregation at the Evangelical Lutheran when Rev. H. E. Rapp gave his farewell message, speaking from the text 2 Cor. 13:11. "Finally brethren, farewell!"

Many expressions of regret and good wishes were tendered by both congregations to their retiring ministers.

I.O.D.E. Picnic.

The members of the Didsbury branch I.O.D.E. gathered with their husbands and friends for a very enjoyable picnic at the home of Mr. and Mrs. S. Fairfax Brown on Wednesday. In the afternoon softball and end other games were played and all present seemed to have a jolly time.

Picnic supper was served on the lawn, after which the ladies held their closing meeting for the season. The next meeting will be held in September.

Farewell Surprise To Rev. and Mrs. Rappel

A very interesting event, in the form of a farewell surprise took place at C. F. Rennie's home on the lawn at 5 p.m. on June 21st in honor of Rev. and Mrs. Rappel and daughter, Hope who are leaving Didsbury for their new charge at Rosthern, Sask. For six years Mr. and Mrs. Rappel have labored faithfully and faithfully in the interests of the spiritual welfare of their charge here and their transfer to another field is much regretted by a large circle of friends in the church and community.

The program on this occasion began with a sumptuous luncheon on the shaded lawn at which a large number of friends were seated. After lunch several addresses were read along with the presentation of well-chosen gifts to the departing family.

Miss Hope was honored by her Sunday school class with a beautiful picture and a stationery outfit.

Mrs. Rappel was presented with a handsome serving tray (marigold) from the Ladies Aid and Women's Missionary Society in recognition of her work in these organizations. The senior choir presented her with an electric toaster and the junior choir gave her a beautifully designed cake plate in appreciation of her musical assistance. Mrs. Rappel very fittingly responded.

Messrs. H. M. Reiber and Wm. Rappel presented Mr. Rappel with a well filled purse from the congregation, and an address to which Mr. Rappel responded very touchingly. Last, but not least, Mr. Reiber, who was acting as chairman arranged the people in two large circles, the children forming an inner circle, and "Blessed be the Tie that Binds" was sung very feelingly. This closed an evening never to be forgotten.

Boys Reprimanded.

Eleven boys of various ages were brought before the juvenile court Tuesday afternoon and charged with breaking windows, throwing stones at automobiles and other damage. They were all severely reprimanded and ordered to report weekly to the police for the next few weeks.

Canada's Railway Milestones

Fifty years ago, on May 2, 1881, it was to be exact, the first sod for the construction of the Canadian Pacific Railway was turned, thus commencing one of the great engineering undertakings in the world's history and marking the beginning of the world's greatest transportation system. Enthusiasm for and confidence in this great work was mingled with grave doubts and misgivings, and especially in financial circles in the old world were grey heads shaken in doubt over the wisdom of a young country of small population and no accumulated wealth embarking on such a gigantic enterprise.

The contract for the building of the C.P.R. called for the completion of the project in ten years. It is a matter of history that the last spike of the original main line was driven on November 7, 1885. In other words, construction was completed in four and a half years, and on June 28, 1886, the first C.P.R. train to the Pacific coast left Montreal, arriving at Port Moody, B.C., five and one-half days later.

The building of the C.P.R. was in fact the building of Canada. Without it Confederation could not have been achieved nor continued. It is the steel link which bound all of British North America together. The successful carrying through of this huge undertaking not only gave the people of Canada courage, but it established confidence in the new Dominion throughout the world. It was a visible object lesson, an ever present encouragement to the Canadian people in dark days and in undertaking other great enterprises.

With the completion of the C.P.R. possibly many people of that day thought that Canada's transportation problems were solved. Yet within only a few years of the driving of that last C.P.R. main line spike Messrs. Mackenzie and Mann were engaged in building a second transcontinental railway across Canada, and within the brief space of another ten years a third transcontinental was under construction from the Atlantic to the Pacific.

Looking back over the years, and in the light of experience, Canada probably overdid the building of transcontinental main lines, but at the time these works appeared to be necessary and essential to the national well-being and development. Possibly, too, had the Great War not plunged the world into confusion and years of wholesale destruction, the story of Canada's railways would be different. However, to speculate on this is idle. The fact remains that, with that same courage which prompted and successfully carried through the C.P.R., the people of Canada faced and grappled with the problem which confronted them when war broke and the Canadian Northern Grand Trunk Pacific National Transcontinental and the old Grand Trunk were plunged into financial difficulties.

Turning back another page in history, we find that it was only eleven years ago, for the year of May 29, 1920, that responsibility for the operation of the Grand Trunk, the Canadian Government and Canada's post-war reconstruction systems and a reorganization of the railroads, consolidated branch lines, with a top-heavy financial structure, were left on the hands of the Government. Within a decade these have been amalgamated into a mighty and highly efficient transportation machine, with the largest mileage of any railway under one management in the world. An operating deficit of \$22,000,000 in 1920 was transformed into an operating surplus of \$20,884,000 in 1936, and this wonderful achievement is but symptomatic of improvements and advances made in every department of service, until today the Canadian National Railways are a source of pride to every Canadian.

In a previous article it was stated that the people of Canada are an impatient people; that they demand results almost over night; that they insist on having all those services and conveniences which the people of other lands have devoted centuries to creating and developing. And it is true, but possibly what Canadians have accomplished in the life of one or two generations is responsible for this national trait; perhaps their accomplishments are the result of this impatience. Nevertheless, such a national characteristic has its dangers. With all the advantages of our great transportation system, we are now paying heavily for past mistakes, mistakes attributable to our impatience.

And the real danger lies in the fact that we do not appear to have learned the lesson, costly as it has been. We are still vehemently demanding other things which in our own best interests it would be wise to defer for a time until we get our feet a bit more solidly on the ground, and secure for ourselves a stronger position where we can the better stand the strain which these additional and admittedly desirable things will impose upon us as a people.

New Style Typewriter

Studying Bird Life In North

Can-in-the-slot typewriters are the J. B. Scipio, ornithologist of the latest machines for use in the Carnegie Museum, at Pittsburgh, Pa., in Germany. One thousand letters have left with two assistants on an expedition which will take them on to the Arctic regions. They will be used to type exceed this length, they will study sub-Arctic bird life. It is only necessary to insert another. They will be gone three or four months.

Palpitation Of The Heart

Nerves Were All Gone

Mrs. Rose Griffin Ashen, Man., writes: "About five years ago I was troubled with palpitation and heart trouble caused by a stroke, and my nerves were all gone and my muscles sleep. I read about Milburn's Heart and Nerve Pill and decided to try them. After I had taken them for a week I was feeling fine again. I think they are a wonderful relief and wish all others who suffered as I did would give them a trial."

Calgary Exhibition

Poultry Association Endeavoring To Have An Interesting Exhibit

Entry forms to prospective exhibitors in the poultry classes at the Calgary Exhibition and Stampede, to be held June 6 to 10, are being sent out by the exhibition board. Entries close on June 26. A covering letter from Dr. D. S. Macnaul, president of the Calgary Poultry Association, urged that some entries be made by all breeders, even though only one or two birds. "Shows and exhibitions are necessary if we are to continue to breed birds true to type," he says. "The value of the opportunity of placing your birds alongside those of other breeders of the variety and comparing them far outweighs the value of any money prizes you may be awarded—welcome as these undoubtedly are."

Recipes For This Week

(By Betty Barclay)

SPECIAL BREAD PUDDING

2 cups milk, scalded.
2 tablespoons butter.
1 cup stale bread, cut into $\frac{1}{2}$ inch cubes.
1/2 cup sugar.
1/4 teaspoon salt.
1/2 teaspoon vanilla.
1/2 teaspoon almond extract.
2 eggs, slightly beaten.
1 cup coconut, toasted.
Combine all ingredients except butter and bread cubes. Add salt, sugar and flavoring to eggs and beat slightly. Pour milk mixture over egg mixture and pour in coconut. Place in greased baking dish, place in pan of hot water, and bake in moderate oven (375 degrees Fahrenheit) to 45 to 50 minutes. Serve 6.

BUTTERSCOTCH COOKIES

3 1/2 cups special cake flour, sifted.
1/2 cup spoon soda.
1/2 tablespoon cream of tartar.
1/2 cup butter or other shortening.
2 cups sifted brown sugar.
2 eggs, well beaten.
1/2 tablespoon vanilla.
Sift flour once, measure, add soda and cream of tartar, and sift again. Cream butter, add sugar gradually, and cream together thoroughly. Add eggs and beat well. Add vanilla and flavoring. Shape into round squares of snap, wrap each in waxed paper, and chill over night. Remove paper, cut in thin slices. Bake in hot oven (425 degrees Fahrenheit) 8 minutes. Cookies may be sprinkled with chopped nuts before baking. Makes 8 dozen cookies.

Spare the children from suffering from worms by using Miller's Worm Pill, a most effective medicine when taken to the right dose. It has no side effects of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other wormicide is used. It is painless to itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

Watch Screws For Machines

Smallest Made and 182,000 Required
To Weigh a Pound

Watch screws are the smallest made for use in machines. Some of these tiny screws are only one thirty-fourth of an inch in length, one-thousandth of an inch head being one twelve-thousandth of an inch. Such a screw has 360 threads to the inch and 482,000 of them are required to make a pound.

Persian Balsam quickly relieves chapping, windburn, and all roughness caused by weather conditions. Keeps skin soft, smooth and elastic. Completely absorbed by gentle rubbing. Never leaves undesirable stickiness. Stimulates the skin. Makes it soft, supple and pliable. Preserves and enhances natural beauty. Stimulates, refreshes and invigorates. Makes hands soft and flawlessly white. Imparts that subtle charm so essential to true elegance.

Taken Off Free List

No more free matches are to be supplied in smoking rooms and the refreshment counters of the British House of Commons. About 12,000 boxes of free matches are passed out at each session of the House.

The Russian workman, forced to quit a job he liked and work where the bosses need him, must rejoice in the fact that he is no longer slave of a czar.

Japanese Going Into Poultry

Five Thousand Eggs From B.C. Shipped To Japan In Our Weeks

Five thousand British Columbia eggs were shipped in one week to Japan. Japanese experts visited British Columbia poultry farms and selected, almost to an egg, the hatching stock they required. Then they went to the Record of Performance officials, Winch Building, Vancouver, and placed large orders. These eggs sold at prices ranging from \$1 for each egg to \$10, \$20 and \$30 a dozen. T. J. Smith of the B.C.O.P. organization, Vancouver, says that the Japanese experts were very pleased with the poultry business and are learning scientific hatchery management. "They are using British Columbia stock for the foundation of their poultry industry," Mr. Smith said.

When Asthma Comes do not despair. Turn at once to the help effective Dr. J. D. Kellogg's Asthma Remedy. This wonderful drug will give you the aid you need so surely. Choking ceases, breathing becomes natural and without effort. Once used, those who have suffered from it will suffer no more. You have already turned to this famous remedy and ceased to suffer. Get a package this very day.

Valuable Tablets Found

Three New Light On Religion At Time Of Abraham

Eighteen tablets, nearly 4,000 years old have been brought to London, England by C. L. Woolley, who just returned from Ur of the Chaldeans. There are important inscriptions and tablets which throw new light on the history and religion of people who lived at the time of Abraham, about 2000 B.C.

"They represent the worship of God by the common people," he said. "We found them in little chapels built along the public streets of Ur."

Balsam wood is so buoyant that it can support almost ten times its weight.

Crime In United States

Statistics Show Homicides Doubled In Past 30 Years

Statisticians have completed their annual study of homicide in the United States, and have produced figures that should appear proportionately with the effect of the compilation of a year ago. These researchers have collected data from thirty-one cities with a collective population of twenty-five million people.

In a generation — thirty years — the average homicide rate for these thirty-one cities has doubled. And in one year the rate has gone up from 8.4 to 16.4, the hundred thousand population in 1929, to 169 in 1930.

There were seventeen times as many homicides in the 100,000 as in man's hundred years and Wales.

Then the statisticians add one significant statement: The number of convictions in murder cases in the United States is decreasing steadily. The number of murders is rapidly increasing throughout the country. — Minneapolis Journal.

Service For Theatre Patrons

Delivery of theatre tickets by motorcycle messengers to any address within 12 miles of the West End, has been started by the Whitehall Theatre in London, England. All playgoers have to do is to telephone the theatre and order the seats. Payment is made on delivery of the tickets, no delivery charge being added.

Interesting Information About Galaxy Of The Milky Way Given By Eminent Astronomer

How science has discovered the vast size of the watch-shaped system of stars called the "Milky Way" was described by J. S. Plaskett, F.R.S., director of the Dominion astrophysical observatory at Victoria, B.C.

The diameter of the "Milky Way" is now estimated at 50,000 light years, the veteran astronomer told his audience of scientists and literary men gathered at Toronto for the third annual meeting of the Royal Society of Canada. "The light year," Dr. Plaskett explained, "is the astronomer's yardstick, the distance light moving at 180,000 miles per second would travel in a year, or six million billion miles."

Many are 5,000,000 light years apart, said Dr. Plaskett, and a gap of 1,000,000 light years separated the sun from the nearest star, thus showing the infinitesimal chance of collision.

That the galaxy of the "Milky Way" is a great disc of stars and star clouds, some 200,000 light years in diameter but only 10,000 in thickness was asserted in 1918 by Harlow Shapley, now director of the Harvard Observatory. The sun is not at the centre of this gigantic system, said Dr. Plaskett, but only the tenth of an astronomical unit apart from the inhabitants of the earth as "the local cluster." Recently scientists have developed a theory that the whole galactic system is rotating in its own plane, like a spinning disc, the centre of rotation being about where the "Milky Way" clouds are thickest.

It was difficult to prove that the whole galactic system is in motion remarked Dr. Plaskett, for if it turned no a whole there would be nothing to compare it with and no movement could be detected. But it has been discovered by the observatory at Victoria, that the most distant stars move more slowly than those near the centre of the system just as the outer planets of the solar system move more slowly than the inner planets. "The motions of these stars," he asserted, "agreed exactly with those we would give if rotation of the galaxy that they can be no reasonable doubt of its presence."

This rotation, stated Dr. Plaskett, caused the sun and neighboring stars to move about the distant centre of the galaxy at a speed of nearly 200 miles per second; or 2,000 times faster than the 350 miles per hour record in the Schneider Cup races, the fastest man has ever been able to move over the surface of the earth. "So vast is the galaxy," he continued, "that it will take the sun some 250,000,000 years to make one revolution; in the whole space of geological time on the earth we have travelled around the centre only five or six times."

"Our conviction of the reality of this rotation," he concluded, "is much increased when we learn that the direction to move the distance from the earth to the galaxy which can be calculated from the motions of the stars observed at Victoria, are almost exactly the same as those earlier obtained from the distances of the stars and the dimensions of the galaxy."

The speaker, who attracted many of the public to hear his address, is a Canadian savant, well known to the astronomical fraternity throughout the world. At Victoria, he is in charge of the world's second largest telescope. Dr. Plaskett was recent-

"Have you permission to move things out of the nursery?"

"No. I was afraid to ask for fear I might be refused!" Sondergästes-Straß, Stockholm.

W. N. H. 1909

Production Of Raw Furs

For Industry Last Year Contributed Over Twelve Million To Wealth Of Canada

Canada's production of raw furs in the twelve months ended June 30, 1930, had a total value of \$12,208,547. These totals represent the values of parts of animals taken by trappers and those from fur farms, the value of the latter constituting approximately 10 per cent of the total in the last three years.

For the first time in the history of the fur trade the silver fox leads all other kinds of raw fur in value of production, with a total in 1929-30 of \$2,716,264, nearly the whole of this amount being contributed by the fox farms. Next in order of importance is the muskrat with a total of \$1,781,651, followed by the white fox with \$1,238,917, the beaver with \$1,025,033, and the mink with \$1,010,188. These are the only kinds of furs with values of production in the period under review exceeding a million dollars.

As in former years, Ontario occupies first place among the provinces according to value of raw fur production, the total for this province amounting to \$3,931,574, or 24 per cent of the total value for Canada. Quebec, the Northwest Territories, Saskatchewan and Alberta follow next in the order named, each with a product valued at over a million dollars.

Advice For Bee-Keepers

Colonies Should Be Examined Frequently If Weather Is Unfavorable

The spring of the year is a critical time for the bee-keeper. The weather is suitable for the opening of hives; the bees may suffer for want of food, which is necessary for the strengthening of the colonies for their summer's work. According to the Federal Department of Agriculture the colonies should be examined weekly, weather permitting, or fortnightly if the weather has been cool during the spring. This examination is necessary to determine that the brood is expanding properly, and to see that the bees are gradually consuming the stores and replacing them with brood.

It is important that the bees have a reserve store of a few pounds to carry them over a period of unfavorable weather and a shortage of nectar. Explicit instructions for the handling of the apary at this or at other seasons of the year are contained in Bulletin No. 33 of the Department of Agriculture.

Alberta Cattle Clubs

Formed Under the New Federal Livestock Policy

"Cattle clubs formed under the new federal livestock policy by which three pure-bred bulls are loaned for six years, with changes made every two years for each three clubs of a breeding centre, have made good progress in Alberta," says the Edmonton Journal. "To date there are 63 bulls scattered all over the province. Each centre selects one breed and while the majority of clubs to date secured heref and general purpose breeds, a number of clubs have requested dairy bulls of the Ayrshire, Holstein and Jersey breeds, also Red Poll. Most of the bulls already placed have been shorthorn with 40 per cent Angus Herefords and other breeds."

Central Steam Heating

A thousand men will soon start work on a \$1,500,000 addition to one of Winnipeg's residential central steam heating systems, says the Western Canada News Bulletin.

Volcanic Ash In Calgary

Find Four-Inch Volcanic Ash Bed Within City Limits

The discovery of a four-inch volcanic ash bed within the city of Calgary, Alberta, was announced recently by Dr. J. A. Allan, professor of geology at the University of Alberta. Speaking at a meeting of the Royal Society of Canada, at Toronto, the geologist surprised his colleagues by delivering an unexpected account of volcanic activity in Alberta, the surface of which has been heretofore considered purely cretaceous or chalky.

Dr. Allan said the Calgary ash bed, discovered by him four weeks ago is without impurities, as though it had just been dropped by the wind from a distant volcano. It extends for one-half mile and is about to be hidden by the construction of a reservoir. In his opinion it dates from the pleistocene period. "Where did it come from?" he asked, declining to offer his own explanation.

Other geologists working in Alberta have located traces of volcanic activity, says Dr. Allan. In 1924 Lt. G. W. L. Dickey found a series of four to five inches of volcanic ash bed in a grey sandstone near Edmonton. A 16-inch ash bed is known to exist 250 feet below a coal bed in the Belly River district.

Ship Wheat To New Port

Shipment Is Made Of 100,000 Bushels To Port In Algeria

For many years the Canadian-grown wheat has been shipped to ports on the seven seas, but recently a shipment of 100,000 bushels of wheat was put aboard the S.S. Brandon at Moncton, destined to Moustagan, Algeria, a port which has never before figured in the clearance forms of vessels leaving Montreal. The harbour at Moustagan cannot accommodate vessels of the "Brandenburg's" draught, so that unloading of the bulk cargo will be made into lighters on that port. The "Brandenburg" also carried wheat for Marseilles, France, and Tripoli, Sicily.

Last year Canada shipped 189,190,470 bushels of wheat to 23 countries and 42,761,284 barrels of wheat flour to 53 countries. Most of the wheat went to the British Isles, which took 125,561,283 bushels, and was Canada's best customer for flour with 28,454,512 barrels, with Britain a close second with 28,132,248 barrels.

An expert on earthquakes declares that people in houses need exaggerated effects of an earthquake whereas people in automobiles get a minimum shock.

After experimenting for five years an Onchan physician has bred wingless and almost clawless chickens

CAMP FOR HIKERS

Alpinists and hiking enthusiasts are to be given a splendid opportunity of investigating the possibilities of the Tongua Valley, one of the striking scenic areas of Jasper National Park, through the operation from Aug. 2 to Aug. 15, of a climbing-hiking camp in this area under the jurisdiction of Cyril G. Yates, noted Canadian alpinist.

Mr. Yates is a climber of many years' experience in the Canadian Rockies, and has participated in many notable ascents. He will have with him Hans Fuhrer, noted Swiss guide, and the transportation and commissary arrangements for the camp will be in the hands of Jack Hargreaves, of Jasper.

The expedition to the Tongua Valley will leave Jasper on the morning of August 2nd.

Plan Which Would Fix A Standard Coin For The Empire Is Furnished By Vancouver Man

Wage War On Insect Pests

Damage To Crops In One Year In Canada Estimated At \$12,500,000.00

Entomologists of the Canadian Government Department of Agriculture have again organized their war machinery and started it in action against insect pests throughout the country. These pests, notwithstanding the organized scientific offensive against them, do over \$125,000,000 damage to trees, shrubs, plants and crops. If the entomologists did not wage relentless war during the growing season would amount to hundreds of millions of dollars.

This year intensive campaigns are to be conducted against grasshoppers, wireworms, the wheat stem sawfly, the pale western cutworm and the red-backed cutworm, the Colorado potato beetle, the imported codling moth, beetles, and several other destructive members of the insect tribe. A special organization is employed to attack the pest which unless checked, would destroy forests.

For several years the entomologists have claimed decisive victories over their enemies and this year they expect to score a rout. The battle is on in earnest and will continue in intensity until the autumn. The casualty list will total countless millions and the country will be saved, many times the cost of the campaign.

Should Receive Medal

New York Hotel Has Installed Elevator For Dogs

If the Society for the Prevention of Cruelty to Animals has a medal or a prize, or even an honorable mention for the best suggestion for humanitarian treatment of animals, that medal, prize or honorable mention should go this year to the Hotel Crocker in New York City, which has established private elevator service for masters and their dogs. Dog lovers, dog-haters and neutral parties will welcome a device which eliminates the danger of small paws being stepped on in criss-cross elevators, and of small teeth being wielded in anguished protest.

After experimenting for five years an Onchan physician has bred wingless and almost clawless chickens

While the vexed question of currency and its effect on international trade depression is to the fore at Ottawa, credit for originating a plan which would fix a standard coin "rex" for the Empire, and even for the world, has been given by Prime Minister Bennett to a Vancouver man, Thomas Shaw Jenson. He has been studying this question for 40 years.

It was in 1903 that Mr. Jenson, then interested in farming near Innisfail, Alberta, met Mr. Bennett, a young lawyer from Calgary, at a Conservative picnic. Mr. Bennett became interested later in Mr. Jenson's plan for simplifying trade.

The idea, Mr. Jenson explained recently, is to establish a standard unit of 10 grams coin gold, which would be approximately \$6 in Canadian money.

This would save "one hour a day" universally in conducting the business of international exchange. The British "rex" would bear the same relation to the Canadian "rex" as the American dollar now bears to the Canadian dollar.

Different figures for the same prices in different countries obstruct foreign trade," Mr. Jenson explained, "but all could be adjusted to one unit of 10 grams coin gold—that is to the 'rex' of \$6. Each country could give it a national name and use their old currency names for trading it."

One "rex" would equal 100 "cent" in Mr. Jenson's scheme. The Chinese "sun" could be issued as four cent; the Indian rupee as ten cent; the English crown at 20 cent.

"Exchange in paper, silver or gold currencies would be thus simplified," he added. "All currencies can be adjusted to the international system without breaking the associations."

"When all nations are using the same figures for the same prices (namely, weight of coin gold) instead of different figures, it would save business millions by making the price immediately understandable in exchange. Prices would be exactly understood in all countries. The proposed would not affect the silver standard."

In addition to discussing the question with Hon. R. B. Bennett and Lt. Hon. L. C. M. S. Amery, former secretary of state for the Dominions, Mr. Jenson has talked about it with leading world bankers, and has found general support.

Mr. Jenson was chartered accountant in Calgary for many years before moving to Vancouver.

Sourd Proof Boards

Invention Of McGill Professor Is Praised With Great Possibilities

If the recent discovery of Prof. H. E. Reilly of the Physics Laboratories, McGill University, Montreal, proves as successful as hoped for, the neighbour's radio, or any other noise, pleasant or raucous may be shut out, if his sound proof boards are used in the construction of the house, the office, or any other kind of building. These boards made from waste wood products have, according to a press despatch, proven successful under several tests. Acoustic or sound proof boards made from sugar cane bagasse have been imported into Canada, but the new Canadian product will be much stronger. It is said that buildings constructed of Prof. Reilly's invention will be so noiseless that a steel riveter working next door would be unheard.

So you got 2,000 shillings compensation from the master who ran over you. What have you done with the money?"

**Beef Council
Aids Producers**Beneficial results attend First Three
Months' operation of New
OrganizationGratifying results have attended
the efforts of the Council of Western
Beef Producers, according to Jack
Bvers, secretary-manager of Calgary.
Although only formed on April 1st,
the Council has already been able
to establish weekly shipments of beef
cattle to the British market and
has secured an allocation of ocean
space that will permit continuous
movement throughout the year.Beef producers to the number of
800 have become actively interested
in the Council, and their holdings
represent some 200,000 head of
stock.The Council of Western Beef
Producers was formed for the sole
purpose of promoting the interests
of those engaged in the Beef Cattle
Industry. The marketing problem has been
attacked as a promising indication
of the success that will attend other
endeavors to be undertaken later.
For this year however, the activities
of this body will be confined to
marketing problems.Rod Macleay of High River, Alta.
is chairman of the Council, and
George Ross of Milk River the other
Alberta representative. D. J. Wyke
of Maple Creek and K. Gilehnik of
Virdon represent Saskatchewan, and
R. H. Holmer of Nickel and W. L.
McMorm of Chilcotin represent
British Columbia.**WHEN GOING IS HEAVY****STEP ON THE GAS**An Advertising Man and one of his
Good Clients were travelling along
the country road one day. The A. M.
was quiet and said for his friend the
G. C. had just advised him two times
he had, the going was tough, and it
would be necessary to reduce his ex-
penses by reducing his sales effort.Now it happened that they ap-
proached a heavy piece of roadway
where the going was tough, for it was
early spring; and the A. M. looked to
see his friend ease up on the accelerator
and save some gas. What was his sur-
prise, however, to feel the car
bound forward under the increased
impetus of more pressure so that they
easily negotiated the hard spot in
the road.When they were safely through on
to the smooth going again, the A. M.
looked at the G. C. with a quick look
in his eye as if he would ask a quess-
ing. But the G. C., anticipated the
inquiry. "All right," he said; "you
win."**LOCAL & GENERAL**Miss Rose Mack left Thursday
last for Waterton Lakes.Mr. Tom Morris made a trip to
Calgary Saturday last.Mr. W. J. Hilliard was a Calgary
visitor Saturday last.Picnic dance at Community Hall,
Wednesday, July 8th. Bowden's
5-piece orchestra.Now ready—Scratch pads at the
Pioneer Office, 2 for 5 cents. Just
handy for the telephone and store.Mr. Ross Ford leaves this week
for Edmonton where he will attend
summer school at the University.Mr. George Mortimer and family
of Mirror, Alberta are visiting relatives
here this week.Mr. and Mrs. Cecil Stider, of
Lethbridge, are spending a two
weeks' vacation here with Mr.
Stider's parents.Mrs. Murdoch and Miss Olive
Greer, of Calgary were visiting the
Mormons here. Mr. and Mrs. Spec-
man and other friends here one day
last week.Mr. and Mrs. T. A. Cunanan
and little son, of Birtte, Manitoba
are visiting at the Huget home.
Mr. Cunanan was formerly the
manager of the Union Bank here.A General Hospital for sick
Watches, Clocks, Phonographs,
Sewing Machines, Etc., Etc. In
front corner of Club Lunch. All
work guaranteed.—Advt.According to the Olds Gazette
there has been quite an epidemic of
chicken-stealing in that district.
One farmer reports losing his whole
flock while another reports losing
forty-five chickens. Even a setting
hen was stolen from a nest of turkey
eggs.A bridal shower was given by
Didsbury residents at the home of
Mrs. E. M. Martens on Monday night
in honor of Miss Dorothy Cipperly
who is to be married shortly. The
bride-to-be was showered with many
beautiful and useful gifts and received
the best wishes of all present.Mr. W. A. Teskey who has
conducted a garage business here
for several years has purchased a
service station at the corner of 4th
Street and 2nd Avenue on the
Main Highway, Calgary. Eddie
Sand and George Hardy left last
week to take charge of the station.
The Teskey family leave for Calgary
this week.Knox United Church has been
holding evening services since its
opening and to say the least the
congregation that attended the first
service conducted by Rev. A. E. Hayes
clearly showed that interest
had been sustained right to the last
service. Rev. A. J. Mitchell, B.A.
will be inducted into the pastoral
charge of Knox United Church,
Westerdale and Westover this Friday
evening and it is the wish of Mr.
Hayes that the new minister be given
the same hearty support that has
been shown in the past.**FORUM:**On Sunday, June 28th in the
Didsbury General Hospital to Mr
and Mrs. H. Seibel, a son.

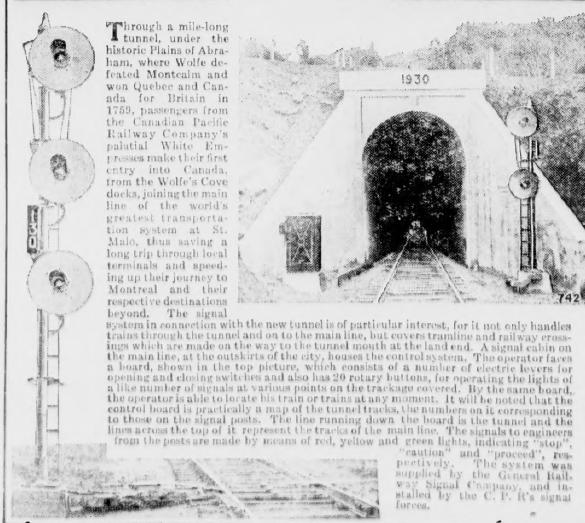

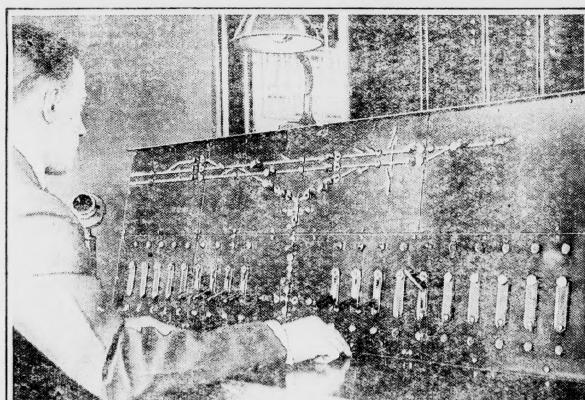

300,000 houses
will burn in Canada and United States
during the year.

NOTICE TO CREDITORS AND CLAIMANTS

In the Estate of DAVID IRWIN, late of the town of Didsbury, Alberta, farmer deceased.

Notice is hereby given that all persons having claims on the estate of the said David Irwin who are entitled to file same before the undersigned Administrator of his Estate by the 10th day of August, 1931, a full statement of the same, detailing their nature and any securities held by him, so that after that date the Administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been filed or brought to his knowledge.

It is best to make your claim now.

Your sample for a stamp may be had at the office of the Secretary at Regina, Saskatchewan, or at the office of the Provincial Secretary, World's Grain Exhibition and Conference, Department of Agriculture, Ottawa, Ontario.

After the close of business on the 10th day of August, 1931, no claim will be allowed.

Keep your stamp and bring it to the office of the Provincial Secretary, World's Grain Exhibition and Conference, Department of Agriculture, Ottawa, Ontario.

Fond Mother! You brute! Look what you've done to my child's banana! - The London Opinion.

WORLD HAPPENINGS BRIEFLY TOLD

Hoping to settle internal troubles in B.C., the government will ask Peter Vereker to hand over the colony of Cestovia to the Sons of Freedom.

Queen Mary, aged 64 years old on May 28, had felicitous powers passed on her from a wide circle of relatives, friends and admirers.

Hon. Herbert Mather, Canadian minister to Tokyo, in an interview urges Canadians to go after Oriental trade.

Regulations governing the shipment of cattle from Canada to Great Britain have been amended to permit the carrying of cattle on open decks in the summer months.

Within the next year between 20 and 30 trade treaties are to be revised, according to a statement made in the House of Commons by Hon. H. H. Stevens.

Export trade in Canadian whisky ran into a tremendous slump during April. The figures were \$169,000 compared with \$2,178,000 for the same month in 1939.

W. G. Duncan, superintendent of the Prince Albert branch of the Soldier Settlement Board for two years, has been transferred to take over the superintendence of the Calgary Alberta office.

Gold seekers have staked claims in the valleys of Long River and Badger Creek, seven miles northeast of Houndsdale. Many traces of gold were found in the valleys about 20 years ago and interest has recently revived.

An announcement that the British Dental Association will meet in conjunction with the convention of the Canadian Dental Association in Toronto during July 1932 was made at the 44th annual meeting of the Ontario Dental Association.

British civil aviation authorities announce the intended opening on August 1 of one of the longest passenger and mail airlines in the world, extending more than 10,000 kilometres (roughly 6,000 miles), from Moscow to Irkutsk and Vladivostok.

New Uses For Wheat

New uses for surpluses of wheat and other grains are being made the subject of an exhaustive survey by the National Research Council, it is announced. Other studies are being conducted in the hope of developing processes which will turn waste materials into products of commercial value.

I am hungry, sir.
Here is some bread and cheese.
I have seen better days!
Then I will get you a serviette!
Peps-Me, Paris.

British Girls Aiding Trade

Join In Campaign To Help Footwear and Costume Industries

Girls, whose job it is to walk 12 miles daily until the peddlers they carry register 500 miles, are helping in a great trade push started by a Liverpool firm to capture for Britain \$1,000,000 worth of trade done annually in rubber footwear in this country by Canadian, Polish, German and French competitors.

The girls engage in daily hikes to see what wear and damage their shoes will suffer, and the company hopes by this means to secure an unshakable grip on the superiority of the British product.

If Britain succeeds in winning the market employment will be given to 6,000 factory hands in Liverpool alone.

Another British firm has planned a caravan tour of Asia Minor and Central Africa to exhibit to the Turkish women and African natives the advantages and attractiveness of European dress. Girls will act as mannequins, and orders for business will be taken all along the route.

The expedition will spend nearly a year on this first effort to popularize modern feminine costumes among the dusky peoples.

Author's Rights Not Recognized

Soviets Have Shown Another Queer Code Of Mortality

So many crimes of murder have been held off the door of the Soviet Republic of Russia that a mere matter of theft seems too trivial to take any notice.

But the cool manner in which an admission has been made is worth noticing.

A New York firm which issues technical books complained to "Avtorg," the Soviet trading agency there, that works published by them had been translated into Russian and circulated in Russia for the benefit of Russian technicians without any compensation to the author. "Avtorg" replied to the following effect: "Soviet Russia does not recognize authors' rights unless author has a special agreement with the Soviet Republic."

That simply means that the Soviet will publish the output of anybody's brains without asking leave and without paying a cent of royalties.

The barefaced manner of this appropriation takes the cake. It is another illustration of the Soviet code of morality which enabled them to appropriate the farms of the kulaks without payment.

Manitoba Copper Mines

"One of Manitoba's copper mines has a daily capacity of 9,000 tons," says the Western Canada News Bulletin. "In a single year it can produce 60,000,000 pounds of zinc, 30,000,000 pounds of copper and gold to the value of \$1,000,000. Another net yet producing, has proved ore to the value of more than \$100,000,000."

Alberta Fisheries

Alberta's fisheries authorities estimate that more than 2,211,000 pounds of fish were caught by anglers in the province in 1930, or several hundred thousand pounds more than in 1929. Pike made up about half the catch.

An authority claims that a goose can live 50 years. Quite a number of humans just begin to realize it at that age.

Advocates Mixed Marriages

Union Of White and Yellow Races To Prevent Race War

Introducing a new marriage between the Japanese and Canadian white races in British Columbia would not only settle the so-called racial problem, but the resultant race probably would be superior to both the present white and yellow races, in the opinion of Dr. Charles Hill-Tout, noted Vancouver anthropologist, expressed in an interview in Toronto.

In ten generations, if racial and cultural prejudices would be broken down and cross-breeding continued, the characteristics of the new race would be fixed, said Dr. Hill-Tout, who is president of the Society of the Royal Society of Canada.

Only by intermarriage to the fullest degree could Dr. Hill-Tout see a solution to the creation of an ultimate race war, with the coloured peoples against the whites. "I think such a conflict is a possibility," he said. "If we don't check up on our air of superiority with India self-government. That seems the only way to me of preventing India from aligning itself with some enemy of Europe."

"All this foolish preoccupation of race just as strong on the part of the Japanese should be broken down," he continued. Denying emphatically the common belief that a mixture of the races usually retains the vices of both, he attributed the result partly to cause, "with our entombed prejudices the resultant product is forced back into the lower of the two races culturally."

It was that way with the half-breeds of Western Canada, he said, who on account of the race pride of the white were forced back to live with the Indians.

If Britain succeeds in winning the market employment will be given to 6,000 factory hands in Liverpool alone.

Another British firm has planned a caravan tour of Asia Minor and Central Africa to exhibit to the Turkish women and African natives the advantages and attractiveness of European dress. Girls will act as mannequins, and orders for business will be taken all along the route.

The expedition will spend nearly a year on this first effort to popularize modern feminine costumes among the dusky peoples.

Author's Rights Not Recognized

Soviets Have Shown Another Queer Code Of Mortality

So many crimes of murder have been held off the door of the Soviet Republic of Russia that a mere matter of theft seems too trivial to take any notice.

But the cool manner in which an admission has been made is worth noticing.

A New York firm which issues technical books complained to "Avtorg," the Soviet trading agency there, that works published by them had been translated into Russian and circulated in Russia for the benefit of Russian technicians without any compensation to the author. "Avtorg" replied to the following effect: "Soviet Russia does not recognize authors' rights unless author has a special agreement with the Soviet Republic."

That simply means that the Soviet will publish the output of anybody's brains without asking leave and without paying a cent of royalties.

The barefaced manner of this appropriation takes the cake. It is another illustration of the Soviet code of morality which enabled them to appropriate the farms of the kulaks without payment.

Manitoba Copper Mines

"One of Manitoba's copper mines has a daily capacity of 9,000 tons," says the Western Canada News Bulletin. "In a single year it can produce 60,000,000 pounds of zinc, 30,000,000 pounds of copper and gold to the value of \$1,000,000. Another net yet producing, has proved ore to the value of more than \$100,000,000."

Alberta Fisheries

Alberta's fisheries authorities estimate that more than 2,211,000 pounds of fish were caught by anglers in the province in 1930, or several hundred thousand pounds more than in 1929. Pike made up about half the catch.

An authority claims that a goose can live 50 years. Quite a number of humans just begin to realize it at that age.

The Adventures of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: Captain Jimmy and Scottie became lost in the dark zone, where they were captured by Chinese bandits. Captain Jimmy eventually came to set free the rest of his party.

Cautiously I moved toward the camp. The three men had stopped now and then, and were looking around. Certainly the outside world was still there, looking for an escaped prisoner, probably the Chinese who had captured them.

Both were now, however, in the frame of mind. Carefully I crawled nearer, a hand held out before me, to feel for the ground, motionless, not even breathing.

As I wriggled closer I could make out his features. Sure enough, it was poor Jimmy. He was the picture of nothing. He was exhausted and so cold and scared, I never saw a finger in warning and work, I never saw a face so pale and haggard. I could hear him breathing, but I could not see him.

I crawled closer. The dog to my right barked again.

"What happened to Scottie?" the dog barked again.

"I found him on the lead—dog he was!"

"And the Chinese?" I asked.

"They're here," he said.

"How did you get away?" I asked.

"I found a hole in the fence and crawled through it."

"How did you get away?" I asked again.

"I found a hole in the fence and crawled through it."

"How did you get away?" I asked again.

"I found a hole in the fence and crawled through it."

"How did you get away?" I asked again.

"I found a hole in the fence and crawled through it."

"How did you get away?" I asked again.

"I found a hole in the fence and crawled through it."

"How did you get away?" I asked again.

THE DUSTY HIGHWAY

BY CHRISTINE WHITING PARMENTER

Copyright 1929

CHAPTER XIX.

During the next week Nick had no time for introspection. The days were crowded with the winding up of his business—the mailing of his report and certain important papers—a letter to John Maxwell, accepting his generous offer to “take more time,” and a long and loving explanation to Gay, telling the whole story, and how his decision to come back to her at once had been changed by this unexpected, almost incredible good fortune. He wrote:

Just imagine, dear girl, cruising around these parts. Of course you'd tell me you know it! I weren't so sure of that I wouldn't consider it for a minute. I gather from your last letter that everybody's all right, and that you're home. I'll admit that at night I get homesick, and wish I'd stuck to my first plan, still I think if I did we'd never have met.

So I'm going. It will mean only a month, though. They're to drop me where I can get a boat—probably some point in Cuban Archipelago, send some money along. And come! I'll write if I get a chance to mail anything, though that's unlikely. However, I understand that the yacht's equipped with wireless, so you can get me. Can't you hold back the apple blossoms till I come? I don't want to miss 'em!

This was but a small part of that letter. Knowing Gay's feeling about Angela, Nick explained her part in the invitation with almost too much caution. He had great stress on the kindness that had made her take the journey to Kingston for the sole purpose of giving him this chance. He said as he had said so often in the past, that he really wanted to go just for her, and that she was an unhappy person. If he could help her to forget things for a while, it might repay her a little for her thoughtfulness in asking him to go.

On the day this letter reached Bordenville, Gay was not well. She was resting in her bedroom when Sonny brought in the mail, which consisted of her letter, and the usual postcards for the little boys. Gay read them aloud to Sonny, and as he descended to share them with Uncle Sim, she turned to her own letter with a sense of overwhelming gladness. It would doubtless tell when Nick was coming. His last note had hinted that the work was reaching completion, and that she could look for him before many weeks.

Gay had missed his husband more than she would let herself admit. If, as Nick said, he felt when away from Gay like a man minus an arm or leg, Gay herself felt a sense of oppression.

Lovely Skin

Vegetable Pills Did What Creams Couldn't

I find and write Miss E. E. Clapham that our little Liver Pills will do more to keep the skin clear and the skin free from blemishes than all the face creams I have used.” Dr. Carter’s Little Liver Pills are no ordinary pills. They are All-VITABLE and have a definite, salutary tonic action upon the liver. They help Constipation, Indigestion, Headaches, Asthma, Allergies, Duggins, 25¢ and Taxed packages.

W. N. U. 1899

Number Of People Afraid Of Lightning
And Still Will Risk Their Lives In Many Ways

Uncle Sim, I—I don't like Mrs. Halliday.

“Mm,” grunted Simeon, then “Nick'll find her out, honey. Nothing' like hard travel to show up people's fallin'.”

“But Nick's so trusting. He thinks everyone's as splendid as he is himself. And she's clever, and older than he, for all she looks so girlish. I shouldn't want her to make a fool of him.”

“Don't you trust him, Gay?”

She flushed hotly. “Of course I trust him! I don't trust her, that's the trouble. Oh, I'm not jealous. I'm not. I'd trust my husband on a desert island with the prettiest woman in the world; but I have a feeling that Mrs. Halliday has some reason for her interest in Nick. Why should she have taken him on?”

“I guess it's because she could have a feeling that Mrs. Halliday has some reason for her interest in Nick. Why should she have taken him on?”

“She wants his scalp most likely,” mused Simeon wistfully, “but if I know Nick, he'll have some little trouble prying it loose. Now you go wash yer face, dearie, and come down to dinner. That hired girl Julie Nipps found us some cook. I think maybe I'll take over the housekeeping from now on, so you won't know what you're goin' to set down to. Maybe some surprises'll give you more relish for your victuals. My old woman used to say she got sick to death o' known' what was comin' on the table, even if she didn't cook it herself.”

Gay pressed her cheek lovingly against the old man's arm. (To Be Continued.)

A Unique Industry

Town Of Norway, Maine, Has Large Snowshoe Plant

Snowshoes are still may be out of season, but in the small town of Norway, Maine, on the Norway branch of the Grand Trunk Railway, the Canadian National Railways.

One of its largest industries is the manufacturing of snowshoes and skis and it boasts the largest ski and snowshoe factory in the new world.

Improved machinery, now being installed will greatly increase the present annual output of 10,000 pairs of snowshoes and 60,000 pairs of skis.

Each year the hides of 3,000 steers are cut up for snowshoes filling or strings and 200,000 feet of white ash are used for the frames. Snowshoes varying in size from a child's model measuring 9 inches by 32 inches to a 6-foot Peary model are made in Norway as well as sides from 3 to 9 feet.

Melvin Tammam, of fiddling fame who lives in Norway, designed and made the snowshoes used by Rear Admiral Robert E. Peary on his successful dash to the North Pole.

Wise mothers who know the virtues of Mother Graves’ Wren Extractor always have it at hand, because it proves its value.

Cattle Shipments To Britain

Livestock Shipments In 1930 From August To End Of Season

Reached the threshold

Following the revival last summer, after an absence of some years, of Canadian live cattle shipments to the British market, 3,581 cattle reached the port of Manchester from the Dominion before the initial shipment made in August and the end of 1930, writes Harry A. Scott, Canadian Trade Commissioner, at Liverpool, in the Commercial Intelligence Journal.

“Lookin’ here,” he said, “how's Nick to get back if they’re cruisin’ off in them out-o'-the-way places?”

“They’ll drop him somewhere—some part of Cuba, probably. Perhaps he’ll write more definitely before they start. You can read the letter, Uncle Sim. It’s a darling letter, and of course I understand; only only,

There Should Be No Ugly Women!

These are 2 classes of women, attractive creatures.

(2) Those mortal ones who don't know how to make themselves beautiful—rather those who don't know the vital importance of Krischen Salts to physical perfection and health.

Krischen Salts are a perfect blend of the six vital minerals which Nature ordained, glands, glands, glands, and glands. These glands daily receive from food if they're to function correctly and which are impossible to obtain in this age of modern cooking.

The body is full energy your complexion should be gloriously smooth and clear. Krischen clears blood of impurities, removes poisons, poisons which cause headaches, blackheads and pimples. Your wonderful new energy will surprise you mind to be so keen and alert no more wretched feeling getting up in the mornings.

Little Helps For This Week

Therefore if any man be in Christ he is a new creature; old things are passed away; behold, all things are become new.” 2 Corinthians v. 17.

Whatever hath been written shall remain. Not he erased nor written over again. The unrighteous only still belongs to thee. Take heed and ponder well what that should be.

—John Wadsworth Longfellow

We cannot undo the past and begin afresh. We have to take the past at the starting point and determine the element of the future. But the gospel reminds us that what cannot be obliterated may be transmuted by divine grace. In Christ Jesus we may become new creatures; and in the eternal life that we begin in union with Him all old things, so far as there is any condemning power in them, pass away, and all things in the King, the works of creation, become new.—Hugh McMillan.

The Many-Purpose Oil. Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for earaches, burns, scalds, the pains of rheumatism and sciatica, sore muscles, sprains, etc. It is also very largely to certain ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine oil, remedy which has made thousands of men friends during the past fifty years.

Turkish City Dwindling

Constantinople Is Rapidly Losing Place As World City

Constantinople, once the proud capital of the sultans, is gradually dwindling into insignificance as a world city. In 1924 a rough census of Istanbul, as Turks call the city, showed a population of 1,065,000, of which about 656,000 were Moslems, 297,000 Greeks, 73,000 Armenians and 12,000 Jews. Three-quarters of the city had then a population of only 673,000. Recently the municipal electoral committee, while taking a census in preparation for the elections found that the population of Istanbul has slipped downward 119,000 since 1927. Evidence of commercial stagnation are apparent on every hand.

War Relics Found In Park

Workmen unearthed a number of World War relics in Kelvingrove Park, Glasgow, Scotland, recently. Among them were two hand grenades and four live eighteen-pound shells. It is believed they were stolen from a munitions factory during the war and hidden in the park.

CORN LIFT OFF Pain Stops!

An amazing remedy acts in a few seconds and cures in pain. The corn shrivels up and disappears. After application two and the corn drops out. Wonderful, yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 25¢.

Westcott Notes.

Softball games are being held at Westcott every Wednesday evening at 7 p.m. A game will be played on July 8th between Sheldon Owen's team and Ira Scott's team. The last game was played between Harry Steckley's Dog Pound Sluggers and Norman Tuggey's Sol Eaters, resulting in a win for the latter by a score of 13-10. Everybody is welcome at these games.

The regular meeting of Westcott W.I. was held at the home of Mrs. Alec Robertson, junior on Thursday, 25th June. The business of the day was a quilting for Mrs. Harry Steckley. After the quilt was finished a short program was given. Roll call was answered by an exchange of quilt blocks. A musical selection was rendered by the Leesburg band and a short recitation by Glen Lovell good. Mrs. Webster's paper on "League of Nations" provoked a good deal of discussion and was much enjoyed, as was the lunch served by the hostess, Mrs. Steckley. Fourteen members and four visitors were present, not including the children who, released from school enjoyed a game of ball.

Mountain View Notes

The annual picnic at Community Hall on July 8th promises to be a nice affair and all who intend being present are assured of a good time.

Miss Brown accompanied by Mr. and Mrs. B. A. Atkinson and Mr. and Mrs. Towns and daughter Marie spent Saturday at Sylvan Lake.

The monthly meeting of the W.L.I. took place Monday, June 22nd at Community Hall. Arrangements for the picnic on July 8th were made. A report of the work of the Legion was given and a talk after which an instructive paper on "Legislation" was given by Mr. J. Worrall. A contest on W.I. constitution was given and prizes awarded to Mrs. Woods and Mrs. Jack Haynes. A social hour was held after the meeting, the hostesses being Mrs. Shultz and Mrs. Barnes.

Local News

"The Bad Man" at the Opera House, Thursday, July 9th. With Walter Huston. He's a bad hombre but boy he's good, he lives to love and loves to live.

Mr. and Mrs. W. Simon and daughter, former residents of this district and now of Salem, Oregon are visiting relatives and friends here this week.

Mr. Alex McNaughton went to Calgary Monday to take part in the rifle shot held there this week. Mr. M. B. Clemens has charge of his office during his absence.

Miss Dorothy Tuggey and Miss Lydia Brown arrived to Edmonton after spending a three weeks vacation at home. They will take up their second years training at the Royal Alexander Hospital.

Rev. A. E. Hayes appeared on Main Street Monday evening with his newly painted car and trailer and offered to take certain business men a ride around the block in the trailer in order to try it out before making the trip north.

The Bank of Montreal closed its branch here Tuesday. Mr. Campbell, manager returns to Calgary. Mr. Ted Brown has been transferred to Carstairs. Mr. Ray Crosswell to Donalda, Alberta and Miss Margaret Ranton to Lacombe. They leave next week-end for their new posts.

FOOTBALL.

In a Rosebud League game here Saturday night the local soccer boys defeated a strong Eagle Hill eleven in a closely contested encounter by a score of 1-0 and thus registered their first win.

Eagle Hill kicked off with the advantage of a strong breeze and immediately went to the attack, but the local defence was giving nothing away. Speedy end to end play was witnessed and half-time came with a blank score sheet.

In the second half Didsbury took up the attack and for the rest of the game the visitors were pretty well pinned to their own half. Five minutes from the end Davies scored a well-deserved goal for the home team. Another good crowd witnessed the game.

This was the last home game of schedule, the two remaining games for Didsbury are at Olds and Eagle Hill on July 8th and 15th respectively. It is hoped to arrange an exhibition game here in the near future.

SOFTBALL

The Country Clowns regained their former distinguishing reputation last Friday evening when they defeated Harmattan in a closely contested game, the final score being 18-12 and thus tying the points for each team.

The highlight of the game was a home-run by Greta Folkman. In the seventh inning Emma Befus was slightly injured and her place was ably taken by Ruth Frisch. A dispute over the rules was satisfactorily settled by the scorekeeper, Grace Irwin.
